Can you think of sipping espresso from a plastic cup? Can you imagine drinking espresso from a styrofoam cup? You cant can you? To drink an espresso you need to sip it from an espresso cup. Espresso experience wouldnt be the same if it is not sipped from an espresso cup. Espresso cups are the traditional containers for espresso using other containers will certainly cause a difference. If coffee can be sipped from styrofoam cups the same thing cannot be applied to espresso because it makes it less appealing.

Espresso cups are widely available. In fact you can easily purchase this cup at any home improvement stores or specialty boutiques. Espresso cups also vary in size some are big around 8oz. while others are rather diminutive around 4 oz. Sipping espresso from an espresso cup is certainly an experience worth remembering.

Espresso cups make serving espresso more appealing. Espresso cups that have simple and classic designs always looks better. Espresso is a formal caffeinated beverage so it would certainly look good in a classy cup. When you sip espresso spend enough time appreciating espresso cups.
